

The world centrum

Istanbul is a city where you can find each type of everything you want to do. I will call the place for the world centrum. But what can be so special with Istanbul since I am calling for the world centrum? The place has some very special characteristics that no other cities in the whole world has. Because of this, in this essay, I am going to tell about for why the city is very valuable. Also, why Istanbul is a place that everyone should visit.

To begin, as so much we know, Istanbul has been the capital city of the very large empires that had the control of the mostly part of the earth. It's like the Rome-, the Byzantium, the Latin- and the Ottoman empire. The three first empires have been owned by the Christians, while the last empire by the Muslims. Moreover, the place is very special for the two largest religious communities in the earth. But today, Istanbul is a usual large place (with the population) and not owned by any religious community (secular area).

Well, the second is that Istanbul is just the area in the world that consist of two continents, namely Europe and Asia. Therefore, it's located at least three bridges that's made to cross between the continents, either with cars, busses and trains. A disadvantage is the traffic that's lasting always in every day. As a solution, it's being created more bridges, roads and tunnels to reduce the city's traffic. In that case, the people should manage to reach their destination with less traffic problem.

The lastly one is how Istanbul is today like the city's relationship. Especially, after the twenty-first century, it has been created many projects that has been realized. It has caused to a much-developed city and that the place is one of the nicest area around the world during 15 years. Very good examples I want to give are the world biggest bridge that is made to cross between the continents. Another one is the world largest airport that's still goes on to build.

To summarise, Istanbul is very known and valuable for mostly of the people in the world. It does not exist another city in the world that's divided into two continents. It still goes on to develop yet by realizing the created projects. So, why not travel to that city? Therefore, I will call the city for the world centrum. Because of this, I recommend that everyone should visit to the place, at least once during the lifetime.
